

Recommendation Response from Department of Health Biannual Report – February 2018

June Valerie LOBBAN

June Valerie Lobban, aged 69 years, died on 9 May 2014 as a result of intra-abdominal sepsis and shock with multi-organ failure following intestinal perforation complicating a recent lumbar spine laminectomy.

The Department of Health's Coronial Review Committee will review these findings and make determinations about the relevant stakeholders and appropriate responses.

Progress for both recommendations will be updated in the next report.
